WOOD'S CROP SPECIAL

Giving Timely Information and Prices of Seasonable Seeds

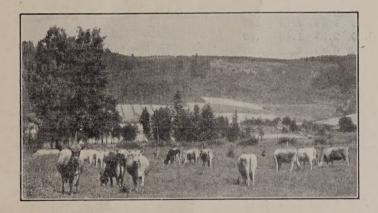

Mention Price List No. 524

SEPTEMBER 11, 1956

Wood's Permanent Pasture and Hay Mixtures

Sow 25 lbs. per acre. 100-lb. bags, \$29.00; 5-bag lots, \$28.50 Pasture Mixture 1, for light gravelly or sandy soil Pasture Mixture 2, for good loam or clay soil Pasture Mixture 3, for moist bottom land Hay Mixture 6, for light gravelly or sandy soil Hay Mixture 7, for good loam or clay soil Hay Mixture 8, for moist bottom land

Southern Permanent Pasture and Hay Mixture 12 produces tremendous yields of the finest pasture and hay on both light and heavy soils in the Southern Coastal area.

Experiment station tests show yields of pasture and hay increase as more seed per acre is sown, up to 25 lbs. and as more different compatable clovers and grasses are added. They concluded: "Using more than one legume in a mix-

ture is a good insurance investment because species differ in adaptability to soil, climatic and biological growth factors."

Our mixtures proved superior for 4 generations contain 6 grasses and 8 legumes, are well balanced, cannot bloat. Nitrogen from legumes keeps grasses dark green and vigorous.

Contains Ladino, Red Clover, Alfalfa, White Clover, Alsike, Birdsfoot Trefoil, Ky. Blue, Red Top, Ky. 31 Fescue, Rye Grass, Timothy, Orchard, etc.

FALL A C P PROGRAM FOR COVER CROPS

"The 1956 Agricultural Conservation Program for Virginia again includes a practice of seeding winter cover crops on those fields where a vegetative cover over winter is necessary to protect the soil from erosion.

"When the practice is approved for a farm by the county ASC committee for the county in which the farm is located, the Government will share the cost of performing the practice with the farmer to the extent of \$2.80 per acre where as much as 20 pounds of crimson clover is seeded, or \$1.25 per acre for a seeding of annual ryegrass, hairy vetch, Austrian winter peas, rye, or mixtures of these crops is seeded. In addition to this, the Government will share in the cost of fertilizer approved and used to the extent of \$1.00 per 100 pounds. This practice and these rates were announced early in the year, and in those counties where funds are available for county committees to approve the practice, it might well result in a considerable increase in demand for seed of these crops."

How to Fertilize and Seed a Pasture

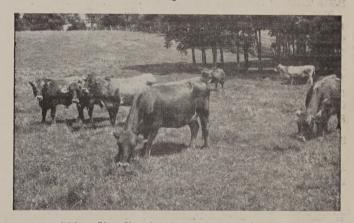

If the field has not been limed recently plow or disc in about a ton per acre before seeding. Deep roots withstand droughts. Encourage deep root growth by plowing down one-half of the fertilizer. Harrow in the rest just before seeding. Use 2-12-12 on heavy or rich soils. Use 5-10-10 on light or poor soil. Up to 1,000 lbs. per acre pays.

The secret of good stands is seed shallow on firm seed beds and press the seed to the soil. Grass and clover seedlings have short roots and must catch hold quickly or die. They smother out if covered over one-fourth inch on heavy soils or one-half inch on light sandy soils. Before planting, harrow and roll until seedbed is firm. Harrow the seed in very lightly then press firm with cultipacker or roll.

Sow 25 lbs. per acre in early fall so the seedlings can grow deep roots to withstand winter freezing and thawing. In the Piedmont or Mountains sow our Mixtures 1 to 8 to suit your soil. In Coastal Plains sow our Southern Mixture 12.

Renovating Worn Out Pastures or Broom Sedge Wasteland, disc or harrow in the lime and fertilizer. Seed and roll firm. Lime gets rid of the broom sedge and encourages legumes, which enrich the soil with nitrogen, stimulates the growth of good pasture grasses and increases their protein, mineral and vitamin content. Pastures yield three times more after renovation. Swamps may make your best pasture if ditched or drained and Pasture Mixture 3 sown.

Wood's Grass Seeds are thoroughly recleaned and tested, have the highest purity and germination to produce quick stands and vigorous growth of productive, weed-free hay, pastures, beautiful lawns or parks.

Wood's Grain Pasture Mixture

Furnishes more grazing in less time and at less cost than other spring crops. Highly nutritious balanced diet. Cannot cause bloat. Reduces grain feed when costs are high. Saves labor in feeding. Small grains make more growth in cool weather than pasture grass or legumes. Our mixture contains Oats and Rye Grass, Beardless Barley, Wheat and Rye, which grow in colder weather than oats. Dwarf Essex Rape stays green and palatable in the coldest weather, high in vitamins and relished by all livestock, particularly hogs and poultry. Crimson Clover and Hairy Vetch supply proteins for growth and warmth in cold weather and enrich the soil with nitrogen. The ideal nurse crop for seeding permanent pasture mixtures. Drill 100 lbs. per acre.

100-lb. bag, \$8.00; 5-bag lots, \$7.75, f.o.b.

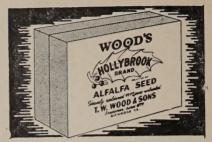

Wood's Grain Hay Mixture

Makes bumper crops of nutritious hay, easy to cure, relished by all livestock. A balanced ration of protein, vitamins and other food elements. Much more productive and palatable than oats or any other crop sown alone. Ideal nurse crop for seeding permanent grass and clover, as it comes off early. Sow 100 lbs. acre. Fertilize well. 100-lb. bag, \$8.00; 5-bag lots, \$7.75 f.o.b.

Wood's Hollybrook Brand Alfalfa Seed for Making Tea USED FROM COAST TO COAST

Hundreds of customers tell us that Alfalfa Tea is very beneficial in the relief of Arthritic and Rheumatic like painss. We have a complete file of letters from a vast number of satisfied customers, telling us the great relief obtained from using Alfalfa Tea, where other remedies have failed. Double boxed to prevent contamination. Directions in each package.

Postpaid, 1-lb. box, \$1.95 5 boxes, \$9.00

LADINO CLOVER

California Grown Only Cert. California and Oregon Ladino is eligible for P.M.A.

Sow 1 to 2 lbs. Ladino with 10 lbs. of orchard grass or tall fescue in early fall. Add 2 lbs. of Red Clover and 5 lbs. of Alfalfa for more summer pasture. Wood's Permanent Pasture and Hay Mixtures contain all these with additional grasses and clovers for maximum year 'round production and highest feed value.

KANSAS ALFALFA U. S. Verified Origin

Premium Quality. Eligible for P.M.A. For years Kansas has been recommended by the U.S.D.A. and Southern state experiment stations, where it has made top yields, persisted longer, resisted diseases and winters.

Put alfalfa on deep, well drained soils. Use 1,000 lbs. of borated 2-12-12 at seeding and 800 lbs. each spring. Inoculate and sow 25 lbs. per acre in August or September on a firm seedbed; cover one-fourth inch; cultipack or drag.

Conditions of Sale: . The seeds, bulbs and plants listed here have been sold and are delivered upon the condition that if they are not true to name and kind or are not as otherwise described on the label or container, the seller's liability is limited to the purchase price thereof. If this condition is not satisfactory, they should be returned at once for proper credit.

Postpaid Prices apply to Va., N. C., W. Va., Md., Del., N. J., Penn.

- Postage on Field Seed to Other States: To S. C., Ga., Ky., Tenn., Ohio, Ind., N. Y., New England and Mich., add 5¢ per pound to postpaid prices.
- To. Ala., Ark., Fla., Ill., Iowa, La., Miss., Mo., and Wisc., add 7¢ per pound.

To Texas, Okla., Kansas and Neb., add 9¢ per lb. to postpaid prices.

Postage Does Not Include Express or Freight Charges

Wood's Double Cleaned, Treated Seed Grains GROWN FROM REGISTERED OR CERTIFIED STOCK SEED 99% PURE

New Bags. High Germination

We **Treat** all Wheat, Oats and Barley to insure better stands and disease-free crops.

We grow many thousand acres from the finest Registered or Certified Stock. No crop is planted in a field where other small grain grew last season. All fields are carefully rogued and fields inspected for certification.

We breed small grains in Va. and N. C. for high yields and resistance to disease, cold and lodging. Our new strains are tested by experiment stations through the South, who report most favorably.

Seneca Wheat

Is a twin sister of Thorne, identical except it yields more, has higher test weight per bu., best grain quality and is replacing it. It looks like Thorne, big, long solid heads, copper color, medium tall, very stiff straw, resists storms, winter, mosaic and loose smut; stools well. Virginia recommends it. Low in lodging.

Thorne Wheat

Most popular wheat in the Upper South, is smut, mosaic, mildew and winter resistant. Stands up well; combines easy; large heads; big, plump grain, good milling quality. Recommended in North Carolina mountains.

Atlas 66 Wheat

Atlas has made record yields and is recommended from Louisiana to Maryland. It has very dark green foliage, vigorous fall and winter growth, and is the best for winter pasture. It has stiff medium tall straw, easy to combine.

Longest Bros. field of FULWOOD Oats yielded over 100 bushels per acre.

Fulwood

Outyielded all other oats on the recommended list in the Piedmont section of N. C., on a 4 year average. Was second highest yielding in the Coastal test. Also recommended in Virginia for February planting. In eastern Virginia fall or spring planting.

Fulwoods are nearer to the type of oat most desired by all farmers; shortest strawed oat entered in N. C. and Va. tests; they ripen uniformly; slightly earlier than Woodgrain. Our tests show they stand better on rich land, also under high fertility conditions than other varieties.

Woodgrain

One of the most outstanding oats developed in recent years. Outyielding all other oats on the recommended list on a 4 year average in the official N. C. Coastal Plain Test.

Excellent in uniformity, of ripening, standability, stooling and seed quality. Approximately the same maturity as Fulgrain. Especially recommended for mid-winter planting in Virginia; fall and mid-winter planting in the Carolinas. Can plant up to March 7th. Recommended for grain, hay or silage.

OFFICIAL NORTH CAROLINA TESTS

Data From Latest Farm Research Reports Nos 1 and 17

By Department of Agronomy, N. C. State College,

Raleigh, N. C.

PERFORMANCE OF OAT VARIETIES

Average 4 Years-1953-1954-1955-1956

LEE	69.3	

Fulgrain 3

Resistant to Victoria Blight. An Improved Fulgrain Selection. Very popular due to high yield, standability and earliness. Usually ready to harvest 10 days earlier than regular Fulgrain and Victorgrain.

Lee Cold Proof

Unusual Vigor; Very Productive. Resistant to Victoria blight. Has made consistently high yields in state Experiment Station Tests, around 100 bus. per acre. Makes large yield of hay. Very winter hardy.

Arlington Oats

High yielding both for grain and hay. They are more winter resistant than many varieties and can be planted later. They are disease resistant, grow off fast in the fall, have a wide leaf and easy to combine.

Forkedeer Oats

Very winter hardy, high yielding variety of oats, recommended where winter killing of oats is a problem.

Cyclone Seed Sower

The Cyclone is a splendid seed sower that will pay for itself in a few days in the time it will save, besides sowing grass and clover seeds and grain of all kinds faster and more evenly and uniformly than is possible by hand. It will sow as fast as you can walk, and the quantity can be regulated to any amount to the acre.

By mail postpaid, \$4.55. Not postpaid, \$4.15
